David Erenfeld - Full Stack Developer

1020dudu@gmail.com | 050-3781079 | GitHub | LinkedIn | Portfolio

About Me

Experienced full-stack developer with a strong focus on building real-time applications using client and server-side technologies like React, Node.js, and MongoDB. Actively seeking a full-time position to apply and expand my expertise in solving complex challenges.

Technical Skills

Languages: JavaScript, TypeScript, HTML, CSS, Node.js, SQL, MongoDB

Client-Side: React.js, Socket.io-client, Responsive Design

Server-Side: Node.js, Express, JWT, MongoDB

Tools: Git, Docker, Jest, Swagger, Heroku, Netlify

Projects

Starbucks Locations Map (React, OpenLayers) Live | GitHub

• Interactive map displaying Starbucks locations by country. Deployed on Netlify.

Geo-Location Service (Node.js, Turf.js) GitHub

• Backend service for geospatial calculations to determine Starbucks locations within countries.

Code Mentor Platform (React, Socket.IO) Live | GitHub

• Real-time collaborative code-sharing platform with mentor-student roles.

Travel Easily front-side (React, TypeScript) Live | GitHub

• Full-stack platform for planning and sharing multi-day trips with real-time interactions.

Travel Easily server-side (Node.js, Express, MongoDB, JWT, Jest, Swagger) Live | GitHub

• Backend service for handling user authentication, trip sharing, and real-time interactions.
• Implements JWT authentication, Mongoose for MongoDB schema management, Jest for automated testing, and Swagger for API documentation.

Education

B.Sc. in Computer Science, College of Management

Udemy: JavaScript, Web Development Bootcamp, HTML/CSS

Languages

Hebrew: Native | English: Basic proficiency
